

N-MC-DC

MCP Accessory - Intelligent Manual Call Point Dust Cover

General

The N-MC-DC is a dust protector cover for manual call points. It limits the ingress of dust from building materials into the manual call point during construction or renovation of the building. It additionally provides clear indication to the user that the device is currently out of service, avoiding dangerous situations from occurring when alarm notification is needed.

User Friendly

The dust cover displays out-of-service text in Dutch, English, French, German and Italian, with a clear picture indication that maintenance is currently in progress.

Details

- Easy to install and remove
- Prevents contamination of the manual call point during building works
- Clearly indicates when a manual call point is out of service
